## How a Traineeship secured an Apprenticeship for Shanice...

“Traineeships are something I never considered until Juniper introduced them to me. To begin with I was against them, however I now think they are a great idea and before all apprenticeships start everybody should do one.

My reasoning for this is because they give individuals the opportunity to see what a particular role involves before signing any kind of contract; it gives chances. From my own personal experience of being part of a Traineeship I was able to try out different areas in business which helped me have a good idea of what specific career path I wanted to take. Therefore, more and more people should know what a Traineeship is and why they are beneficial. Moreover, Juniper have been so helpful and I'm really grateful.

I never thought that I would pass maths or have the opportunities I have. However, Juniper have aided me in passing maths as well as getting me an apprenticeship in the right career path with Staff Direct 4 U. **Thank you.**”

“Juniper Training have been helpful and friendly from the get go. They contacted us to offer a student on a pre apprenticeship placement for 12 weeks. I was a little unsure at first as we had just taken on an apprentice and were concentrating on getting all of her recruitment and induction in place but we went ahead and it was completely hassle free.

Juniper did all of the leg work from arranging DBS checks and personally bringing the student to us to introduce her. They found us a hard working and eager to learn student and we look forward to working with Juniper in the future.”

**Laura Robinson, Little Robins Nursery**

“Juniper have worked really well with my daughter. She always talks about how supportive staff are towards her and want her to achieve.”

**Raj (Mother to Simmy)**
